

Meeting Log  
EECS 348 Term Project  
Lingfeng Li, Zach Sevar, Asa Maker

11/01/2023

- We spent some time going over the document and discussing what kind of software architecture we wanted to use. We also discussed the modules we wanted. We briefly filled out the document with the intent of revising it over the next week.

11/05/2023

- After the submission of our 2nd part to the term project, we made sure to check the document for any grammar errors or improper indentation or spacing. After confirming that the document was formatted correctly, we felt confident that the document would be good for submission. We decided to wait on submitting in case we had any last minute changes to our project or software architecture.

11/11/2023

- This last meeting acted as a final review of our document. We all were satisfied with the document and its content for moving forward with the development of our project
